

Mendocino

☘ Feeds through leaves and roots

Formulated to aid and support flower development.

Recommended for plumerias, gingers, adenium, aquatic pontederia, clerodendrum, hedychium and costus.

Feeding Directions: Sprinkling can, siphon injector system, back pack spray.

Foliar Spray: Dissolve 1 tablespoon per 5 gallons of water. Apply as full coverage spray to wet leaves. If ground is dry, water thoroughly the day before. Apply every 10 to 14 days as needed.

Soil Drench: Dissolve 1 teaspoon per gallon of water, apply to base of plant under drip zone of leaves.

Hydroponic: Use 1 teaspoon (4.7 grams) per 5 gallons of water.

Siphon Mixer: Injector ratio 1:15, mix 2 ozs. of *Hula Bloom* per gallon of solution concentrate.

Use level teaspoon or tablespoon when measuring.
